DID YOU KNOW THAT MILK ISN'T LIKE OTHER DRINKS?

No, milk is special. Unlike some other drinks, it doesn't have any other added ingredients. So it's pure, fresh milk. And nothing else. (which means that moms and dads think milk is cool, too).

We don't put anything else in, because milk already contains lots of amazing things to keep you healthy. You can't see them. (they're invisible), but they're there...

CALCIUM!

— keeps your bones and teeth good and strong.

VITAMINS!

— great for giving you energy.

PROTEIN!

— makes your muscles grow.

Want to hear what's really great? Milk now comes in handy cartons, so you can have milk on your breakfast cereal, with your lunch, or as a snack. But whenever you have it, you'll know it's good for you. Because milk is **INCREDIBLE!**
